A Spray Bottle is a simple tool that you would never think to use for photography, mostly because we stay clear of all water whenever given the chance. Spray some water on your lens and you can turn a boring "she's-all-that" image into "homecoming queen". You can see it used in action in this behind the scenes clip from our Unscripted series.

35 Pictures That Reveal The Truth Behind Photography ...

While devices like this existed long before true photography, it wasn't until someone decided to place material that was sensitive to light at the back of that room that photography was born. When light hit the material, which through the course of photography's history was made up of things from glass to paper, the chemicals reacted to light, etching an image in the surface.
