How to Make a Box Joint Jig Plan | WWGOA

This jig will allow you to make a fixed-width box joint. It could be a disposable jig, or save it if you think you might use it again. Box joints can be any width you like, but for this setup you will be limited by the width of your stack of dado blades. In general, I think a lot of small box joints looks nicer than a few large joints.

Tablesaw Box Joints | Popular Woodworking Magazine

Essential BOX JOINT JIG Home in on precise finger joints with this table saw sled. By Ken Burton T he box (or finger) joint is a remarkably strong, inter-locking corner joint that can be quickly made on the table saw. The only catch is that you need a jig to help you hold and position your workpieces as you make the cuts.

Box Joint Jig Plans

The most impressive thing about this box joint jig isn't the tight-fitting joints you can make with it. After all, that's what you expect from a precision made jig. What's really unique is how quickly and easily it can be adjusted. Most box joint jigs require an almost endless amount of tweaking. This jig, on the other hand, can be set up in a matter of minutes. The secret is a built-in ...

WOODWORKING JIGS | Top Free DIY Woodworking Jig Plans.

The simple design of this jig creates a hassle-free setup for perfectly sized and aligned joints. The body consists of layers of 3/4" plywood and a hardboard backer. The keys on top of the jig slide easily along the t-track and lock down with socket screws. The keys are sized to match the fingers of the joint, ensuring a perfect fit.

Box Joint Jig | Woodworking Project | Woodsmith Plans

The Advanced Box Joint Jig is a leap forward in box joint jig design, but also very easy to construct, using commonly available material. The jig can be used on both the table saw and the router table, and will produce box joints from 1/8" right up to 1", in 1/8" increments.

Advanced Box Joint Jig Plans - Plans - IBUILDIT.CA

Box joints are a wonderful combination of form and function. They look great, especially when made with contrasting materials and, with their significant surface area for glue, are very strong. Our shop-made table saw box joint jig is simple to make and easy to use. In all likelihood you have enough scrap in your shop right now to build it.

How to Make Perfect Box Joints With a Table Saw Jig

A jig is needed to easily cut 1/2" "fingers" and equally sized spaces in the end of a board. Using this tool will make those cuts clean and efficient. The box joint is

an alternative to the more popular dovetail joint. An interesting point that the box joint is stronger than the dovetail joint, and does not require the custom dovetail jig.
