Diagnostic control is the standard use of performance measures and is primary focused on Feedback control. Performance is measured against a target and management acts on the variance. Diagnostic control also means that performance is regularly reviewed in formal meetings such as board, departmental and team meetings on a regular basis.

Summary of Levers of Control model - Simons. Abstract

Based on a ten-year examination of control systems in over 50 U.S. businesses, this book broadens the definition of control and establishes a critical bridge between the disciplines of strategy and accounting and control. In addition to the more traditional diagnostic control systems, Simons identifies three new control systems that allow strategic change: belief systems that communicate core ...
