ON THE MARINE ALGÆ NORTH-EAST GREENLAND

The term kelp refers to marine algae belonging to the order Laminariales (phylum: Heterokontophyta). Though not considered a taxonomically diverse order, kelps are highly diverse structurally and functionally. The most widely recognized species are the giant kelps (*Macrocystis* spp.), although numerous other genera such as *Laminaria*, *Ecklonia*, *Lessonia*, *Alaria*, and *Eisenia* are described.
