### Natural resource management - Hill Agric

Natural resource economics as a subfield began when the main concern of researchers was the optimal commercial exploitation of natural resource stocks. But resource managers and policy-makers eventually began to pay attention to the broader importance of natural resources (e.g. values of fish and trees beyond just their commercial exploitation).

### **Bing: Natural Resource Economics Notes And**

The 5 Most Important Natural Resources are: Air: Clean air is important for all the plants, animals, humans to survive on this planet. So it is necessary to take measures to reduce air pollution. Water: 70% of the Earth is covered in water and only 2 % of that is freshwater. Initiative to educate and regulate the use of water should be taken.

### **Natural resource economics - Wikipedia**

Here's what happens. When the price of a natural resource decreases, so does its apparent contribution to 'output'. So as resources become cheaper, economists mistakenly think that societies are becoming less dependent on the Earth. This thinking gets it utterly wrong. The price of a natural resource doesn't indicate its importance to ...
