## Reproduction in Farm Animals | Wiley Online Books

The role of reproduction is to provide for the continued existence of a species; it is the process by which living organisms duplicate themselves. Animals compete with other individuals in the environment to maintain themselves for a period of time sufficient to enable them to produce tissue nonessential to their own survival, but indispensable to the maintenance of the species.

## Animal Husbandry: Reproduction In Farm Animals: Female ...

Farm animal breeding and reproduction stands at the beginning of the animal production chain. Breeding contributes to the basis of robust, efficient and healthy animals with a reduced need for medication and increased animal welfare.
