Solution Of Mass Transfer Operations

MASS TRANSFER OPERATIONS The operation lines represented by those two equations are plotted with the equilibrium curve on the x-y diagram. Those equations also show that unless L_n and L_m are constant, the operating lines are curved. The lines can be plotted only if the change in these internal streams with concentration is known.

- Know the different equipments used for mass transfer applications. 6.1 Mass Transfer Fundamentals A group of unit operations for separating the components of mixtures is based on the transfer of material from one homogenous phase to another. The driving force for transfer is a concentration difference or a concentration gradient; much

Mass Transfer Operations Treybal Solution

Mass transfer operations involving the diffusion of the component to be separated through a stationary phase (unidirectional mass transfer) include: gas absorption, liquid extraction, adsorption, and ion exchange. Distillation is a typical process in which the rates of mass transfer of the more and the less volatile components between phases are
