Protection Agency (EPA) and be approved for use in health care settings (i.e., hospital grade). Dental health care personnel should always follow manufacturer recommendations for use of cleaners and EPA-registered disinfectants (e.g., amount, dilution, contact time, safe use, disposal).

### **Dental Materials - SlideShare**

A wide variety of dental materials is used in the oral environment for restorative, prosthetic and implant applications, and these materials are described at length in textbooks [1–3]. While their physical and mechanical properties have been studied extensively, there has been relatively little use of thermal analysis techniques to gain insight into dental materials.

### **Dental material - Wikipedia**

Dental impressions are negative imprints of teeth and oral soft tissues from which a positive representation can be cast. They are used in prosthodontics (to make dentures), orthodontics, restorative dentistry, dental implantology and oral and maxillofacial surgery.: 136–137 Rigidity- Inelastic (rigid) impression materials are used with patients with shallow undercuts.
