What are the new documentation commands available in Xcode 5?

Here is an example of all the options I have found as
of Xcode 5.0.2. That was generated with this code: /**
First line text. Putting \\n doesn't create a new line.\\n
One way to create a newline is by making sure
nothing is on that line. Not even a single space
character! @a Italic text @em with @@a or @@em.
@b Bold text with @@b.

The most important aspects of Xcode 12 and Swift 5.3 have now been showcased, so just go ahead to try them out. Even though various topics were presented, there are still more to explore. Introduced additions and changes, especially in Xcode, are too many to fit in one post, therefore I recommend once again to read what's new in both Xcode and Swift in the official websites.
